

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method in a data processing system for processing multimedia program data, the method comprising:
  - identifying text in subtitles in the multimedia program data to generate a set of text;
  - analyzing the set of text to obtain a rating;
  - identifying a video portion of the multimedia program data that should be altered based on the rating obtained from the set of text to form an identified portion; and
  - altering the identified portion.
2. (Previously Presented) The method of claim 1, wherein the identifying step comprises:
  - performing optical character recognition on subtitles in the multimedia program data to generate the set of text.
3. (Currently Amended) The method of claim 1, wherein the video portion of the multimedia program data includes a video component and an audio component and wherein the identified portion is altered by blanking at least one of the video portion and the audio portion.
4. (Original) The method of claim 1, wherein the analyzing step includes:
  - performing bayesian filtering on the set of text.
5. (Previously Presented) The method of claim 1 further comprising:
  - decoding the multimedia program data prior to initiating identifying text; and
  - re-encoding the multimedia program data after altering the identified portion.
6. (Currently Amended) The method of claim 1, wherein the video portion of the multimedia program data is one of a frame or a group of frames.
7. (Original) The method of claim 1, wherein the multimedia program is a movie.

8-22. (Canceled)

23. (Previously Presented) The method of claim 1, wherein the rating comprises at least one of G, PG, PG-13, and R.

24. (Previously Presented) The method of claim 1, wherein the rating is determined based on information that is configured by a user, wherein the user is a person who is consuming the multimedia program.

25. (Currently Amended) The method of claim 1, wherein the step of identifying the video portion of the multimedia program data that should be altered based on the rating to form the identified portion comprises of comparing the rating to a user selected preference.
